

Fogmaster Tri-Jet 6208

A Durable General Purpose Fogger

The time-proven Fogmaster Tri-Jet[®] 6208 fogger serves the needs of a wide range of uses for both indoor and outdoor application. Food plants, hotels, barns, parks and hospitals are just a few examples of sites which depend on the Fogmaster Tri-Jet for effective treatment.

This pioneering unit, now in its fourth decade of service, provides the standard of reliability against which other foggers are measured. It's in daily use for such diverse applications as controlling odors, disinfecting and sanitizing, carpet mildew control, flood and fire damage restoration, controlling mosquitos, flies and other insects, dispensing water for humidification and dust control and a host of innovative applications.

The portable 6208 is a "cold fogger" -- it handles both water- and oil-based solutions -- and has a one-turn control knob to adjust particle size and degree of misting. The dispensing rate is easy to calibrate in the field to compensate for differences in liquid density or viscosity.

The Tri-Jet fogging head can be adjusted at up or down angles as required. Made of durable aluminum, it's lightweight, but tough enough to justify its five-year limited warranty.

More uses than ever ... another effective solution from Fogmaster.

SPECIFICATIONS

Motor	1 Hp, 120VAC 50/60Hz, 7 amp Optional: 240VAC, 3.5 amp
Fogging Nozzle	Three counter-rotating vortex nozzles
Particle Size	15-30 micron VMD, adjustable
Chemicals	Handles both oil- and water-based chemical solutions (Liquid viscosity and density affect particle size distribution)
Liquid Flow Rate	0-10 oz/min [0-300 ml/min], adjustable
Tank Capacity	1 gallon [4 liters]
Materials of	Power head housing and tank - aluminum Tubing - fuel and oil resistant vinyl

Construction	Fittings and control valve - brass Nozzle - Celcon
Dimensions	H x L x Dia: 15.4 x 12.5 x 8.6 in [39 x 32 x 22 cm]
Shipping Weight	12 pounds
Warranty Period	Five years
